

ARYBHATT

Software Engineer Intern | Full-Stack Developer

📍 Uttar Pradesh, India | ✉️ bhattarya4533@gmail.com 🔗 <https://github.com/arybhatt4533> | 🔗 [Linkedin](#) +91 9517471194

PROFESSIONAL SUMMARY

Software Engineering student (BCA 2027) with a deep focus on Systems Design, Scalability, and Open-Source ecosystems. Proficient in building high-performance modules using Python and Rust, with hands-on experience in refactoring legacy code and optimizing API response times by 15%. Actively contributing to production-grade repositories (Open Food Facts, Kiwix) to prepare for GSoC 2026

EDUCATION

Prof. Rajendra Singh (Rajju Bhaiya) University, Prayagraj 2024 – 2027

Bachelor of Computer Applications (BCA) - Computer Science & Information Technology

CGPA-7.5

- **Relevant Coursework:** Data Structures & Algorithms (DSA), OOPs, DBMS, Operating Systems.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, JavaScript, C++, Java, C# (.NET Familiarity), SQL, React.js, Node.js.
- **Databases & ORM:** MongoDB, MySQL, ORM (Object-Relational Mapping), NumPy, Pandas.
- **Dev Tools:** Git/GitHub, Agile/Scrum, Linux, Docker, Postman, Vercel, XAMPP.
- **Core Competencies:** Computer Science, Security Systems, Troubleshooting, SDLC, API Design, OOPs, DBMS, OS

WORK EXPERIENCE

Software Developer Intern | Tenacious Hub, Noida Oct 2025

- Developed AI-driven marketing modules using **Python**, increasing data processing speed by **20%**.
- Utilized strong **Communication Skills** to collaborate in an **Agile development** team, ensuring seamless delivery of modules and clear technical documentation...
- Conducted troubleshooting and debugging for enterprise-level applications to ensure zero-downtime.
- Refactored core backend logic using **ORM** principles, resulting in a **15% reduction** in server response time

OPEN SOURCE CONTRIBUTIONS

Contributor | Open Food Facts & Kiwix (openzim) Dec 2025 – Present

- Preparing for **GSoC 2026** by resolving high-priority GitHub issues in production-scale repositories.
- Collaborated with global mentors to fix **Security Systems** vulnerabilities and optimize codebase.
- **Open Source:** Contributed to **10+ Pull Requests (PRs)** to optimize codebase performance

PROJECTS

Satellite Threat Detection & Monitoring System (STDAMS) | Python, AI Jan 2026

- Engineered an AI system to monitor orbital paths, identifying **50+ potential threats** in testing.
- Designed a modular architecture that improved code maintainability and scalability for large datasets.
- Optimized data analysis scripts, reducing manual monitoring effort by **30%**.

UDHACK 4.0 Platform | Full-Stack Development Feb 2026

- Led development of a hackathon platform for **500+ users**, ensuring **99.9% uptime** through scalable design.

ACHIEVEMENTS

- **Hackathon Finalist:** Selected for **UHACK 4.0** among top teams in Uttar Pradesh.
- **Problem Solving:** Solved **100+ LeetCode problems** focusing on Computer Engineering logic.
