Ishika Jaiswal

SWE @ Microsoft | Ex- Browserstack, Paytm, CDAC | Building Scalable Solutions
Indore, Madhya Pradesh, India

Experience

Microsoft

Software Engineer

May 2025 - Present (1 year 1 month)

Bengaluru, Karnataka, India

BrowserStack

Software Engineer

January 2025 - April 2025 (4 months)

Paytm

Software Engineer

June 2023 - January 2025 (1 year 8 months)

Bengaluru, Karnataka, India

- Enhanced operational efficiency by automating actions on entities (Merchants, Users, or Systems) based on configurable rules, facilitating bulk actions and maintaining a comprehensive audit trail leading to a 30% increase in operational efficiency and significantly reducing manual workload.
- As a member of the Action Center team, I utilized AWS Step functions, AWS Lambda functions, and AWS Cloudwatch metrics to streamline workflow orchestration, automate processes, and monitor system performance.

NxTechWorks

Machine Learning Engineer

September 2022 - May 2023 (9 months)

- Developed a Medical Recommendation System using Collaborative Filtering to provide a list of possible diseases and suggested measures based on user symptoms.
- Created RESTful APIs to deploy the model using Flask.

- Conducted data analysis on a text-based dataset and developed feature embeddings using Natural Language Processing techniques such as TF-IDF and Skip-gram with Word2Vec.

E-NVEST

Back End Developer

February 2022 - August 2022 (7 months)

- Engineered highly scalable and efficient Node.js RESTful APIs using the Express.js framework.
- Integrated various crypto-currency exchanges utilizing the ccxt library, expanding platform functionality.
- Engineered cloud functions within the Firebase platform for successful REST API deployment.

Indian Institute of Technology, Bhilai

1 year 1 month

Coordinator - Drishya (The Dramatics Club)

April 2021 - April 2022 (1 year 1 month)

Gym Coordinator

April 2021 - April 2022 (1 year 1 month)

CDAC

Summer Intern

May 2021 - August 2021 (4 months)

Pune, Maharashtra, India

- Implemented high-performance numerical methods like Jacobi Linear Solver and Laplace Solver using parallel programming with the MPI Library in C/C++, optimizing computational efficiency for scientific computing applications.
- Utilized the FFTW3 library for Fast Fourier Transform, improving overall system performance for signal processing tasks.

National Service Scheme

Education Coordinator

January 2020 - October 2020 (10 months)

India

NSS - Indian Institute of Technology Bhilai

Education

Indian Institute of Technology, Bhilai

Bachelor of Technology - BTech, Electrical Engineering · (2019 - 2023)
